

Personal Portfolio Website

Project Report | Sawaira Ijaz

Computer Science Undergraduate • Web Development

1. Project Overview

This responsive personal portfolio presents the developer's academic background, technical skills, professional experience, six featured projects, achievements, certifications, and contact information. The design uses a premium dark-and-cream theme with pink and gold accents, clear typography, structured cards, and responsive layouts.

2. Project Objectives

- Create a professional online portfolio for academic and career opportunities.
- Present technical skills, education, internships, and six projects clearly.
- Separate professional achievements from course certificates.
- Provide direct contact through email, phone, and LinkedIn.
- Support desktop, tablet, and mobile layouts.

3. Technologies Used

HTML5 provides the semantic page structure; CSS3 provides layout, styling, responsive breakpoints, hover states, and motion effects; JavaScript supports the mobile navigation interaction. Assets are organized in dedicated image folders.

4. Website Sections

- **Home / Hero:** Introduction, Hire Me and View My Projects buttons, plus academic summary statistics.
- **About:** Computer Science background and interests in web development and digital technologies.
- **Technical Skills:** Frontend, backend, database, and programming skills with visual bars and technology labels.
- **Education:** BS Computer Science and Intermediate in Computer Science.
- **Professional Experience:** Internship experience across technical content, full-stack development, data science and analytics, frontend, and web development.
- **Featured Projects:** Six project cards with image slots, descriptions, and technology tags.
- **Achievements:** Vinix one-year Student ID Card; PTE Pakistan Campus Ambassador; PTE training certificate;

Zidio Development internship certificate in Data Science & Analytics.

- **Certificates:** Course and training certificates shown as text cards; separate certificate images are not required in this section.
- **Contact:** Email, phone, LinkedIn, location, and a contact form interface.
- **Footer:** Copyright and developer credit.

5. Latest Updates Incorporated

- Removed the personal profile-photo requirement; the hero section is text-led.
- Added six project image slots: project1.jpg through project6.jpg.
- Added the Vinix Student ID Card achievement with a one-year description.
- Added the PTE Pakistan Campus Ambassador achievement, ID-card image slot, and training-certificate image slot.
- Added the Zidio Development Certificate of Internship for Data Science & Analytics.
- Kept Achievements separate from Certifications.
- Added prominent Hire Me and Contact links, email, telephone, and LinkedIn.

6. Image and Asset Placement

Use the exact paths below and replace placeholders with real screenshots, card scans, and certificate images.

- images/projects/project1.jpg
- images/projects/project2.jpg
- images/projects/project3.jpg
- images/projects/project4.jpg
- images/projects/project5.jpg
- images/projects/project6.jpg
- images/achievements/vinix-student-id.jpg
- images/achievements/pte-training-certificate.jpg
- images/achievements/pte-campus-ambassador-id.jpg
- images/achievements/zidio-internship-certificate.jpg

No personal profile photo is required.

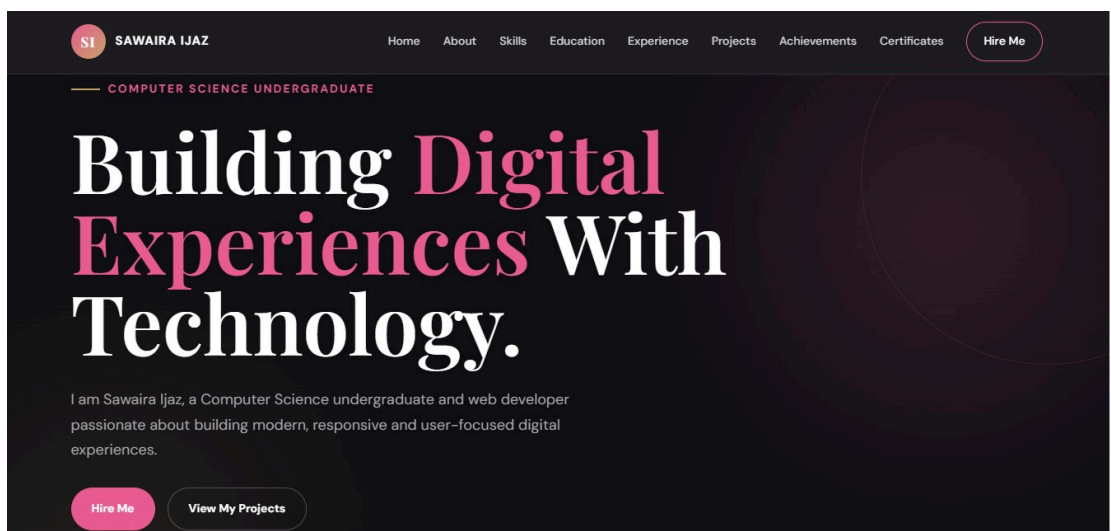

7. How to Run the Project

1. Keep index.html, style.css, and script.js in the project root.
2. Place project and achievement images in their respective folders.
3. Open index.html in a browser or use Visual Studio Code Live Server.
4. Check navigation, image loading, contact links, and responsiveness on desktop and mobile.
5. Capture screenshots of Home, Skills, Projects, Achievements, Certificates, Contact, and mobile views.

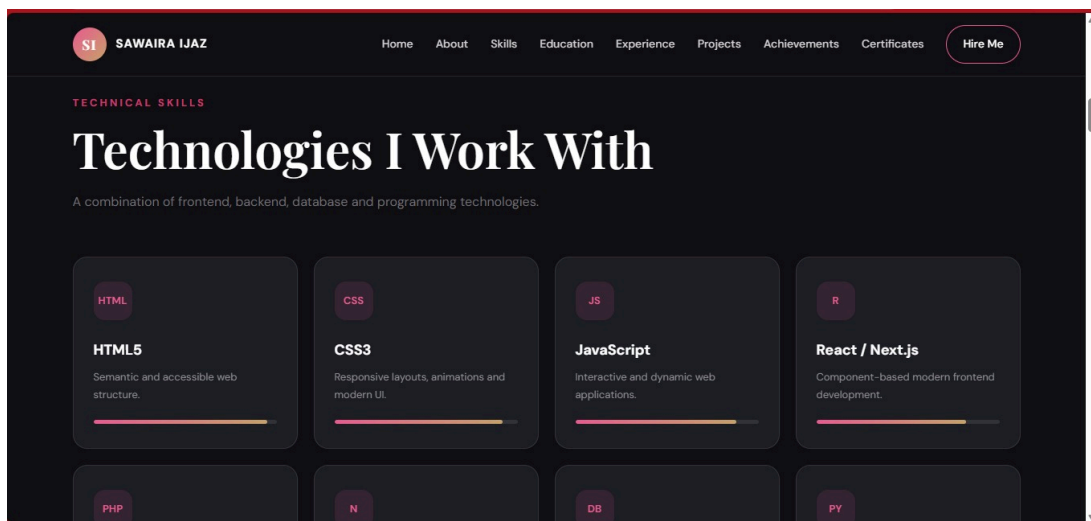

8. Screenshot Placeholders

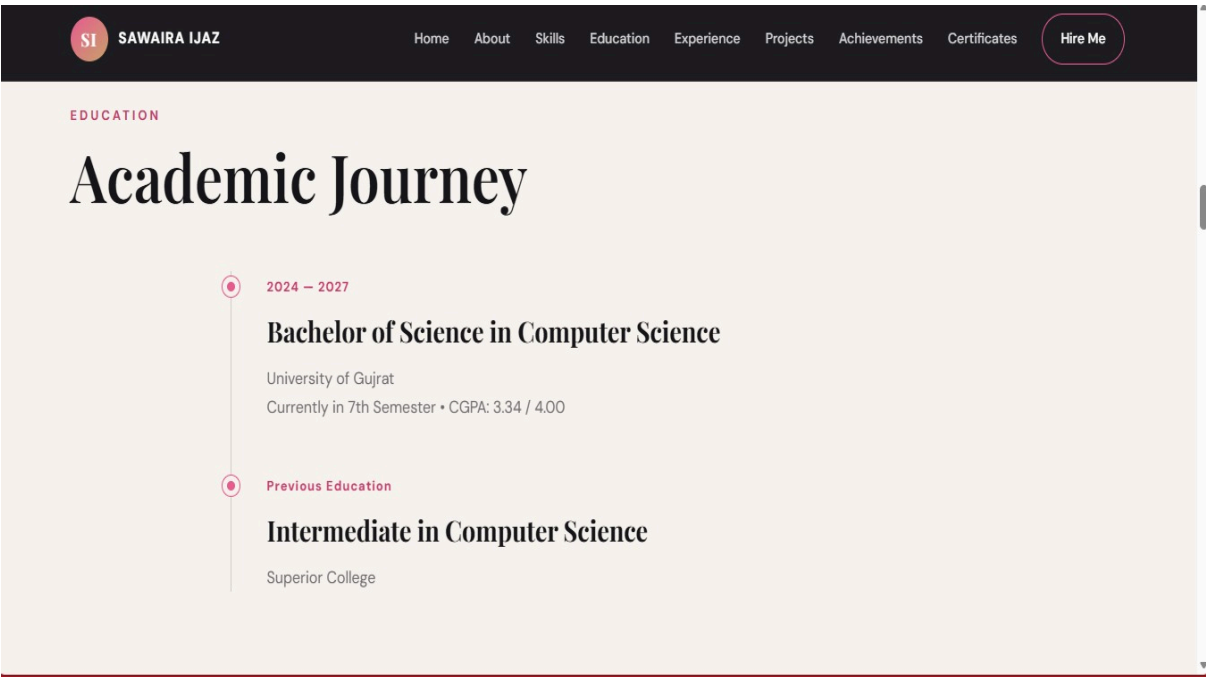

Insert screenshots from the actual running website before exporting this report to PDF.

Screenshot 1 — Home / Hero

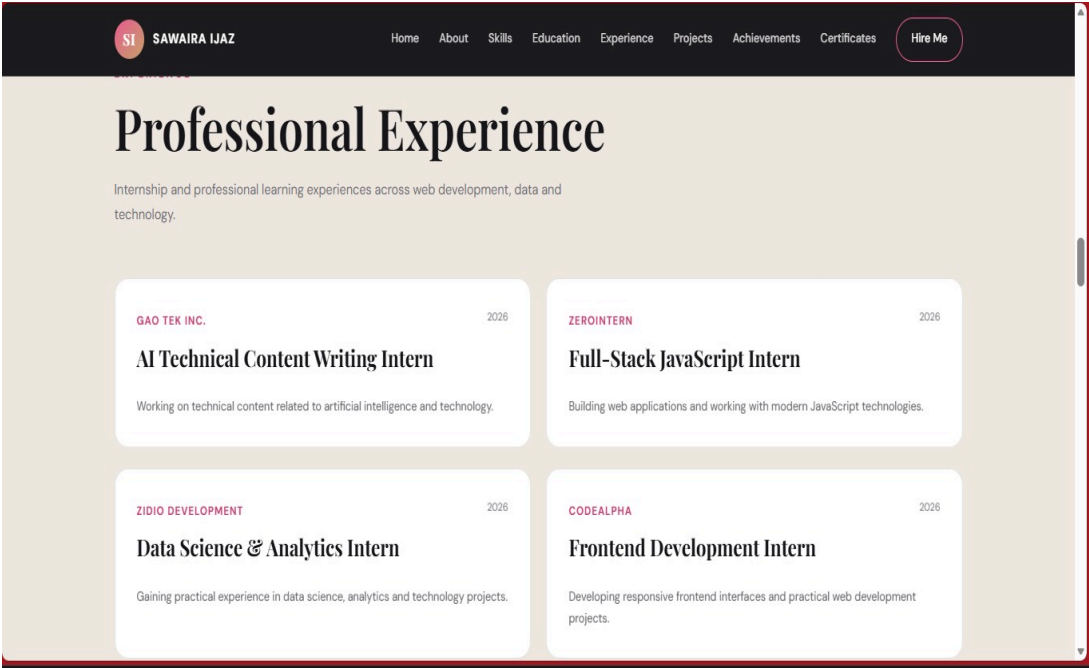

Screenshot 2 — Skills and Education

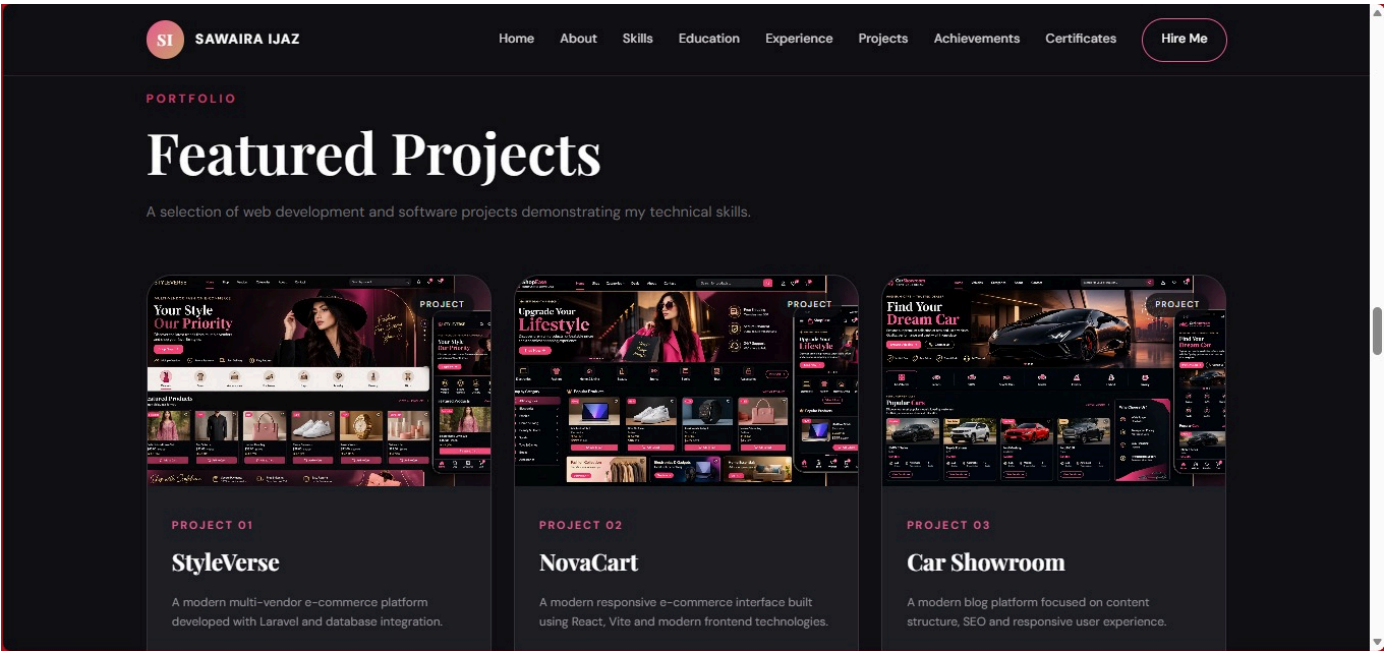

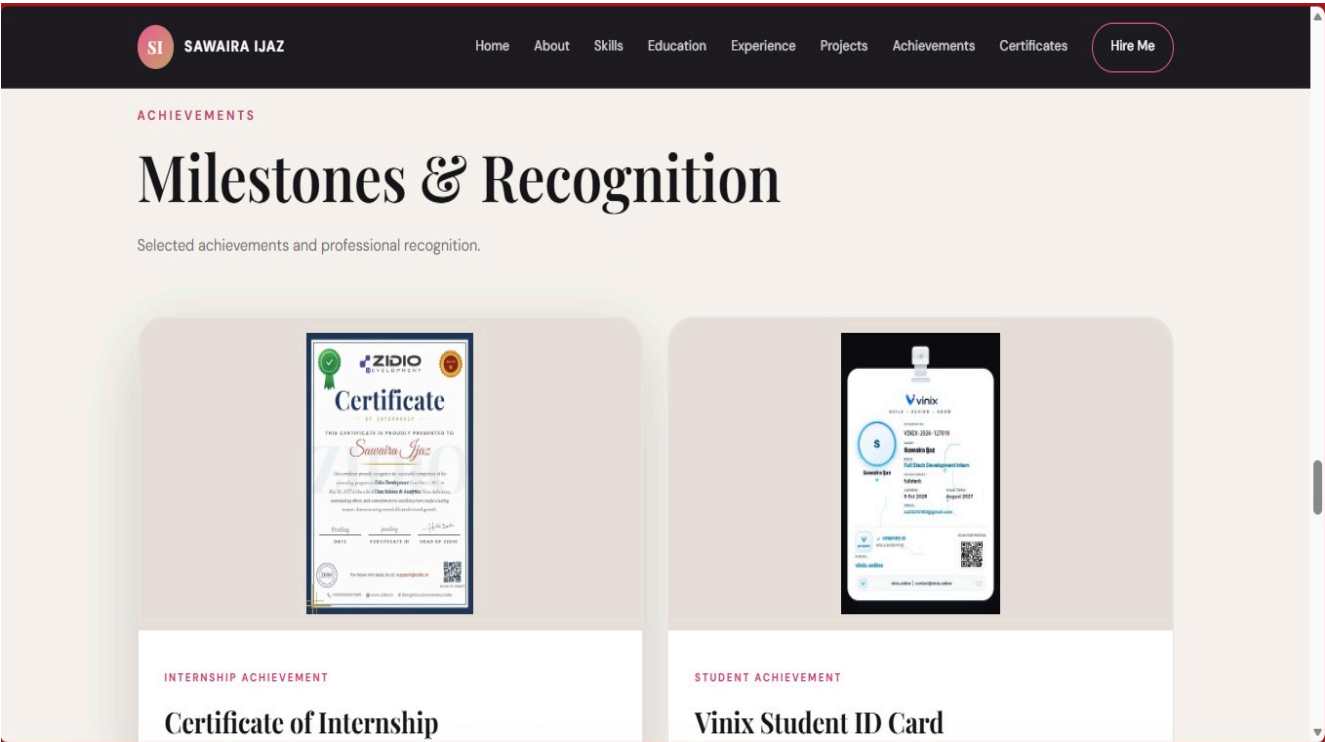

Screenshot 3 — Professional Experience

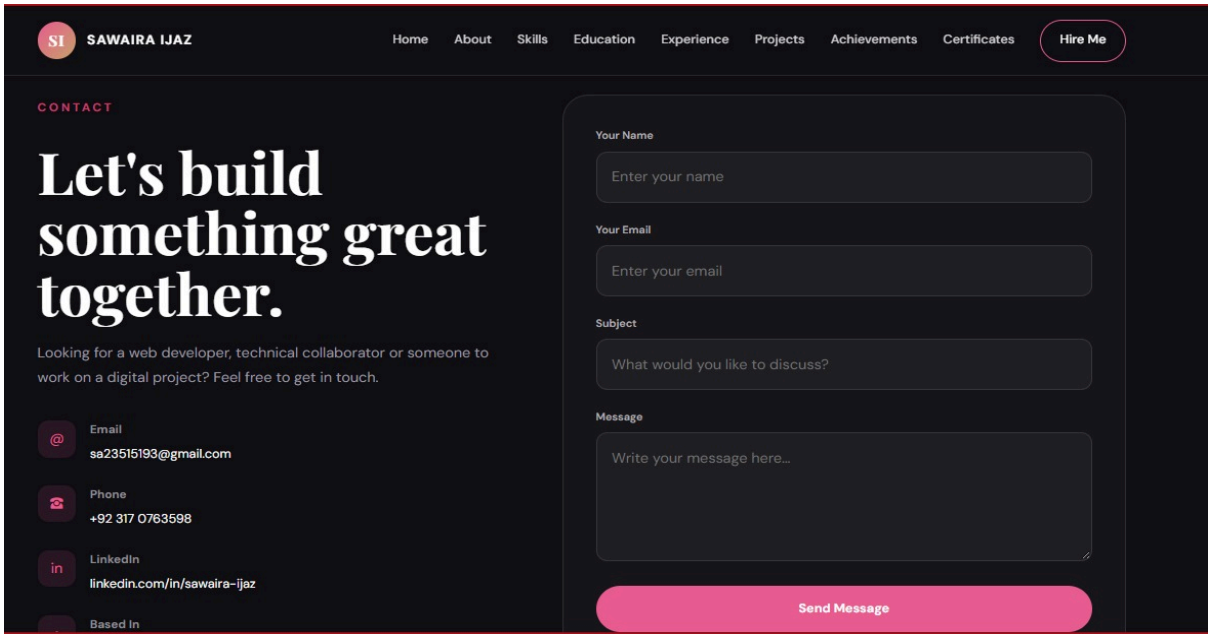

Screenshot 4 — Six Featured Projects

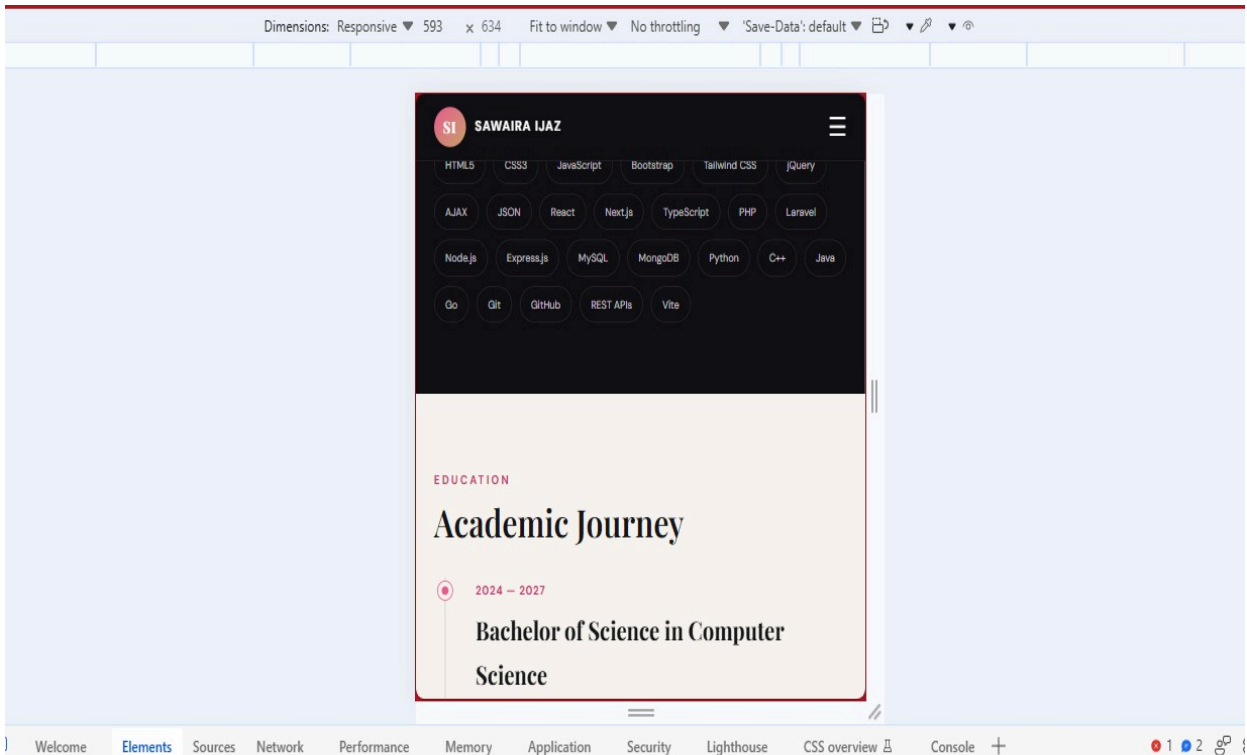

Screenshot 5 — Achievements (Vinx, PTE Pakistan, Zidio)

Screenshot 6 — Certificates and Contact

Screenshot 7 — Mobile Responsive View

9. Conclusion

The updated portfolio organizes academic details, skills, experience, projects, achievements, certifications, and contact methods in one responsive website. Before submission, verify dates and claims, add the real images, test every link, and capture screenshots from the final running version.
